DAILY INFORMATION BULLETIN SERVICE

STRAWBERRY GALLBLADDER

Strawberry gallbladder, also known as cholesterolosis, is a condition where the gallbladder mucosa becomes dotted with yellow cholesterol deposits, resembling a strawberry-like appearance.

VISUAL REPRESENTATION

STRAWBERRY GALLBLADDER

Appearance:

- **Yellow cholesterol deposits on the gallbladder mucosa give it a speckled appearance, resembling strawberries.**

Incidence:

- **Commonly associated with longstanding gallbladder inflammation or conditions like gallstones.**

Symptoms:

- **Typically asymptomatic, but in some cases, patients may experience mild abdominal discomfort.**

Diagnosis:

- **Often identified incidentally during imaging studies such as ultrasound or during surgery.**

Management:

- **Treatment may not be necessary unless symptoms are present. In severe cases, cholecystectomy (gallbladder removal) might be considered.**
